Workforce Development Agency State of Michigan

Program Year 2012
Workforce Investment Act Annual Report
July 1, 2012 – June 30, 2013

Introduction

This report provides a summary of Michigan's Workforce Investment Act (WIA) programs, accomplishments, and performance results for Program Year (PY) 2012, the time period of July 1, 2012 through June 30, 2013. This report is being submitted in accordance with United States Department of Labor (USDOL) Training and Employment Guidance Letter (TEGL) 6-13, issued October 18, 2013.

Michigan's Vision and Mission

The Workforce Development Agency's (WDA's) vision is to promote a flexible, innovative, and effective workforce system within the State of Michigan.

The WDA's mission is to provide thoughtful leadership around critical talent gaps and employment issues, support the development of a strategy ensuring a pipeline of talent that will attract and retain businesses in Michigan, and facilitate the implementation of these strategies statewide.

The WDA will accomplish this by:

- 1. Supporting a demand-driven workforce system.
- 2. Assisting the structurally unemployed with financial independence.
- 3. Advocating for the integration of workforce development into the K-12 school system.
- 4. Supporting the alignment of workforce development with economic development efforts.

Michigan's Strategy

The State's primary workforce development strategy is a demand-driven system that focuses on aligning all efforts, initiatives, programs, and funding around key industry clusters which are supported by labor market information. These key industry clusters are: agriculture, energy, healthcare, information technology, and manufacturing.

Report Contents

- 1. Executive Summary
- 2. Program Cost Effectiveness Analysis
- 3. Evaluation of Programs
- 4. Adult, Dislocated Worker, and Youth Programs and Success Stories
- 5. WIA Waivers and Success Stories
- 6. Tables

Executive Summary

Overall WIA Adult, Dislocated Worker, and Youth program performance for PY 2012 resulted in Michigan meeting or exceeding its negotiated performance levels for all statutorily required measures, including both customer satisfaction measures.

Program Cost Effectiveness Analysis

Adult, Dislocated Worker, and Youth (See Tables 1-3 in Appendix A)

During PY 2012, Michigan served 51,513 WIA adults, dislocated workers, and youth at an average cost per participant of \$2,032. This calculation is arrived at by taking the total program expenditures divided by the total number of participants served during PY 2012. For the year, on average, Michigan expended \$1,381 per adult, \$2,582 per dislocated worker, and \$2,572 per youth participant. Collectively, the state expended \$104,684,403 on services for the WIA Adult, Dislocated Worker, and Youth programs.

Michigan's Dislocated Worker program saw the highest per participant cost, which most likely can be attributed to a large portion of this population participating in various forms of training. The Adult program had the lowest per participant cost, likely due to statewide adherence to key principles of the workforce investment act system, including, but not limited to, empowering individuals through the provision of information, guidance, and support, increased accountability, and universal access to the one-stop system and to core employment- related services such as information about job vacancies available through Michigan's online labor exchange system, MiTalent Connect (www.mitalent.org).

Incumbent Worker Training

Michigan's Incumbent Worker Training program ensures that today's workers can meet tomorrow's challenges. The program is a locally-driven competitive grant opportunity that provides funding to businesses for implementation of a layoff aversion strategy. Training grants are available to help businesses grow and maintain their competitiveness by investing in training for their existing workforce. Training grants are structured to be flexible to meet the businesses' training objectives.

A brief analysis of the program reveals that it accounted for over 55 percent of the Adult program earnings for PY 2012. Total earnings for the Incumbent Worker Training program were \$99,946,971 for average earnings of \$32,524 per adult. This outcome propelled the State's Adult Average Earnings Rate to \$21,462 per participant.

Evaluation of Programs

Customer Satisfaction Methodology (See Tables 4-5 in Appendix A)

Michigan currently utilizes the American Customer Satisfaction Index (ACSI) to meet the customer satisfaction measurement requirements of the WIA. The survey approach utilized allows grantees flexibility while capturing common customer satisfaction information that can be aggregated and compared at the state and local levels. Michigan anticipates maintaining use of the ACSI methodology for PY 2013. Based upon the guidance provided in TEGL 6-13, Michigan will evaluate the use of the ACSI methodology for subsequent program years.

The sampling methodology used to select potential respondents for the surveys ensures the consistent, random selection of a sample of customers eligible for the surveys. Participant samples are drawn on a monthly basis.

The minimum response rate is 70 percent. The response rate is calculated as the number of respondents with *complete* customer satisfaction information divided by the total number in the sample. A survey is considered *complete* when valid answers are provided by respondents for each of the core questions outlined by the Employment and Training Administration:

What is your overall satisfaction with the services?

To what extent have the services met your expectations?

How well did the services you received compare with the ideal set of services?

Michigan recorded consistently high levels of satisfaction from customers surveyed. From January 1, 2012 to December 31, 2012, participants across the state reported an average score of 96.1 percent, exceeding Michigan's negotiated plan level of 93.0 percent and representing an increase of 1.0 percent from PY 2011. The response rate for the participant surveys was 90.2 percent.

Employers across the state reported an average score of 85.0 percent, achieving Michigan's negotiated plan level of 85.0 percent and representing a decrease of 2.6 percent from PY 2011. The response rate for the employer surveys was 95.7 percent.

Research has shown that when a person is satisfied with a service they are likely to share their experience with perhaps five or six other people. On the other hand, dissatisfied customers are likely to tell another ten people about their experience. Given the prevalence of social media in today's society, customers are now able to share their story with an even broader audience. As

such, Michigan sees the measurement of both participant and employer customer satisfaction as one key barometer of overall success in delivering services under the WIA.

Waiver

Michigan requested and was granted a waiver for PY 2012 from the requirement to conduct evaluations of workforce investment activities for adults, dislocated workers, and youth in order to promote, establish, and implement methods for continuous improvement in the efficiency and effectiveness of the statewide workforce investment system in improving the employability of job seekers and the competitiveness of employers. As such, Michigan has no information to include in this report concerning evaluations that either concluded, or commenced, during PY 2012. Michigan also has no information to include at this time regarding planned evaluations for PY 2013.

Adult, Dislocated Worker, and Youth Programs and Success Stories

Improving the Skills of Michigan's Workforce: Special Projects and Initiatives

Michigan Earn and Learn Initiative

Funding: WIA Statewide Activities – Training

Wagner-Peyser – Job Development Specialists

Philanthropic Organizations/Foundations – Subsidized Wages

The Michigan Earn and Learn Initiative is a multi-year transitional jobs project which utilizes philanthropic and public funding resources to offer life-changing employment and educational opportunities to disadvantaged individuals with limited workforce attachment. Individuals prioritized for Earn and Learn include low-income, disconnected, at-risk youth ages 18-24, formerly incarcerated individuals re-entering the workforce, and chronically unemployed adults in select urban areas.

The philanthropic and public funding investments in Earn and Learn will create and fund immediate subsidized job opportunities that are intended to provide incentives for concurrent participant involvement in related education and training programs. Additionally, the program provides comprehensive barrier management, supportive services, and job placement assistance. As a condition of grant award distribution to selected areas, a one dollar to one dollar match in both local philanthropic and State of Michigan provided funds are matched with the Open Society Foundation's match of one dollar. That is, every dollar invested by the State is matched with two dollars in philanthropic funds.

During PY 2012, Earn and Learn had 1,706 active participants. Of those participants, 1,333 (78%) were enrolled in training. As of June 30, 2013, 290 Earn and Learn participants had been

exited from Michigan's One-Stop Management Information System (OSMIS). Of those participants, 245 (84%) were employed at exit.

Mid-Michigan Bio-Manufacturing Alliance

Funding: WIA Statewide Activities

Mid-Michigan possesses a competitive advantage with diverse agricultural production, excess industrial capacity, and advanced educational attainment. In response to the growing bioeconomy, the Alliance was formed to fill an economic void created by the loss of traditional manufacturing in the region by helping to connect agri-businesses to talent and resources.

In cooperation with employers, local community colleges, and universities, the Alliance's target population for training included dislocated workers and other WIA-eligible participants. The Alliance provided training and related services to 176 participants over four years that included hands-on experience and classroom training.

Special Projects and Initiatives Success Stories

Name: Ira St. John

Program: Earn and Learn

Status: Employed

MWA: Great Lakes Bay Michigan Works! Agency

Prosperity Region: 5

Ira St. John began services under the WIA on October 11, 2012. He was interested in training in the manufacturing field. Mr. St. John had recently moved to Michigan looking to start a new career. He determined that Michigan had affordable housing and programs available to assist people in need. When Mr. St. John registered with WIA, he was receiving food assistance and did not have transportation.

Mr. St. John learned about the Earn and Learn program in the Michigan Works! one-stop. Since he was chronically unemployed, staff invited him to attend the next Earn and Learn Orientation. Mr. St. John then was dually enrolled in the Earn and Learn program. He performed very well on the WorkKeys assessments and received soft skills training.

Mr. St. John began attending his first training through Earn and Learn at the Michigan Works! Academic Center in November 2012 and completed all four of the components of Microsoft Office 2003 in January of 2013. He went on to train in Microsoft Office 2007 and was able to complete those components the following April.

Mr. St. John was placed at a work experience through the Earn and Learn program due to his consistent attendance in training. He began working for a recycling center, which was a challenging job. Mr. St. John worked 24 hours a week on average, and also kept up his training attendance. His career managers felt that he needed a more advanced training, so he was enrolled in Building Maintenance training at Education and Training Connection in April of 2013.

In April 2013, Mr. St. John submitted his resume to Nexteer Automotive. He was hired and began employment in May of 2013. Mr. St. John is currently working for Nexteer earning \$12.00 per hour and working 40 to 60 hours per week.

When he began his position, Mr. St. John still lacked transportation and arranged to pay another Nexteer employee to assist him with rides to and from the worksite. In August 2013, Mr. St. John visited the Michigan Works! one-stop to see his career managers and to show off his brand new car. Mr. St. John thanked everyone for all the assistance he received and noted how much his life had changed.

During his participation in the WIA program, Mr. St. John received the following services: academic training, assessment, case management, job leads, soft skills training, vocational/occupational training, and other valuable assistance.

WIA Success Stories

A total of 547,507 adults and dislocated workers received services through the WIA during PY 2012. In addition, 14,112 youths received services through the WIA during PY 2012. Below are just a few examples of the success achieved by Michigan's WIA program participants. Stories from our employer customers are included as well.

Name: Kimathi Austin

Program: Workforce Investment Act – Adult

Employer: United Van Lines

MWA: Detroit Employment Solutions Corporation

Prosperity Region: 10

On January 30, 2013, Kimathi Austin, 39, walked through the doors at Detroit Employment Solutions Corporation (DESC), a Michigan Works! Agency at 707 West Milwaukee in Detroit. Mr. Austin, a married father of a 12 year old son and a 4 year old daughter, had been working as a casual helper at a moving company, making \$11.00 an hour while receiving food stamps to support his family, but he wanted to broaden his skill set and get a better job.

"My goal was to obtain employment locally, with a company that could provide health care and job security for my two kids and my wife Shenee," Austin said.

Rick Ferguson, an individual training account specialist at DESC, worked with Austin on registering him for the Workforce Investment Act Adult program. Ferguson asked Austin a series of questions to see what type of job he was looking for in a high-growth, high-demand industry. Then he screened Austin to make sure he was eligible, gave him the Test of Adult Basic Education to assess his skills, and determined that Austin was a great match to receive training to earn his CDL-A license.

"What stood out to me about Kimathi was his upbeat attitude," Ferguson said. "He showed a great desire to obtain his CDL-A that would enable him to provide for his family and he always kept a positive outlook."

On March 25, 2013, Austin began the 160 hour tractor trailer training course at U.S. Truck Driver Training School in Detroit. Ferguson and Austin kept in touch throughout the training process, with Austin providing updates on his progress. In between his classes, Austin returned to DESC to attend a resume writing workshop at the 455 West Fort Street Service Center. At the resume workshop, he learned how to structure his skills and experience in a marketable way. By April 19, he completed his semester of training and earned his CDL-A driver's license. He proudly brought a copy of his CDL-A to the one-stop service center to show it to Ferguson and to update his file.

Five days later, United Van Lines, a full-service moving and storage company, hired Austin as a full-time supervisor. Austin's annual salary is \$43,680. Ferguson was happy to see Austin again several weeks later, coincidentally, when United Van Lines delivered furniture to the DESC onestop service center. Austin and his assistant mover were the ones to move the furniture into the building. "My life situation is back on track," Austin told Ferguson. "I'm grateful to have had this opportunity."

Name: Jacqueline Fox

Program: Workforce Investment Act – Dislocated Worker

Employer: Cascade Engineering

MWA: Michigan Works! West Central

Prosperity Region: 4

In January 2009, Jacqueline Fox, assistant buyer at Dura Automotive Systems in Fremont, learned she was going to be included in a company-wide layoff that was going to last a minimum of 90 days and could result in a permanent layoff. Worried about what she would do

if her layoff became permanent, Ms. Fox realized she needed to go back to school to earn her degree.

"I had found out there was a program available through Michigan Works! that would help dislocated workers go back to school and knew this would be my chance to get back into college again," said Ms. Fox. Workforce Investment Act Placement Consultant Jill Gasaway worked with Ms. Fox and encouraged her to take a series of WorkKeys assessments that would gauge her skill levels in math, reading, and locating information. "The set of WorkKeys assessments really helped prepare me for the classes that I would soon start taking...it was really beneficial for me," said Ms. Fox.

As a result of working with Michigan Works! West Central and receiving assistance with tuition and books through the WIA Dislocated Worker program, Ms. Fox completed an associate's degree in business management from Muskegon Community College in 2012 with a cumulative GPA of 3.925. After obtaining her degree, Ms. Fox secured full-time employment as a senior purchasing agent at Cascade Engineering in Grand Rapids earning nearly \$22.00 per hour. "I highly recommend anyone who is in a similar situation as I was to seek help from Michigan Works! West Central," Ms. Fox said. "Without the Dislocated Worker program and the encouragement and support of the staff at Michigan Works! West Central, I don't think I would have even thought about going back to school."

Name: Erin Lozen Stoneburg

Program: Workforce Investment Act – Younger Youth

Employer: Insight Institute of Neurosurgery and Neuroscience

MWA: ThumbWorks! Prosperity Region: 6

Success isn't easy and it rarely comes about as a result of one person alone. Success by definition is a favorable or desirable outcome in spite of difficulties along the way. For Erin Lozen Stoneburg, it was defined by her ability to maximize her potential, utilize all the resources available to her, and by determined commitment to achieve that favorable outcome.

Ms. Stoneburg began our program as an in-school youth whose parents had recently divorced and moved away leaving her to fend for herself. Having the support of friends, she was referred to ThumbWorks! and started working with Kelly Lewis from the KIND (Kids in New Directions) program of Lapeer County. Of all the things that "we" thought she was in dire need of, when Ms. Lewis met with Ms. Stoneburg, she simply stated, "all I need is someone to show me how to do things and give me some direction."

Ms. Stoneburg had a job from the start and transportation that was not very reliable. ThumbWorks! was able to assist her with auto repairs so that she could complete high school and continue her employment, and pursue the additional training she knew would be necessary to become self-sufficient and successful.

KIND, as a partner agency, was an integral part of Ms. Stoneburg's success, providing not only mentoring and support services, but also assisting to coordinate community resources to keep her on course. Often, lack of success is not due to lack of will or want, but rather a simple lack of knowledge of all that is out there to provide a willing participant with all the necessary tools to succeed. Ms. Stoneburg is a success in every way because she saw opportunity in every difficulty. Her persistence and determination helped her attain her goals.

Ms. Stoneburg obtained her high school diploma and completed a certificate program in the healthcare field. She continues to be employed full-time at the Insight Institute of Neurosurgery and Neuroscience in Flint, Michigan as a Medical Assistant making \$10.00 per hour with benefits.

Name: Kaitlynn Terrell

Program: Workforce Investment Act – Older Youth to Adult

Employer: Brookcrest Nursing Home

MWA: Area Community Services Employment & Training Council

Prosperity Region: 4

Kaitlynn Terrell entered the Michigan Works! Service Center with the hope of completing her GED. She quickly enrolled in the WIA Older Youth program and began working with her case manager by making goals for herself. At the time Ms. Terrell was not employed, but wanted full-time employment in order to provide for herself. Without her GED, Ms. Terrell found this to be a difficult task.

Ms. Terrell's first activity in WIA was completing the WorkKeys tests. She achieved a Gold certificate level. With this goal completed, Ms. Terrell then moved on to the GED program and created a fast-paced completion plan. She excelled wonderfully in the GED program and took three of the five tests within the first two weeks of enrollment. Ms. Terrell's attendance and motivation were consistent; she completed her GED two weeks later on 4/10/2012.

Ms. Terrell then took a short break to care for her newborn baby. During this time, she remained in contact with her case manager and smoothly transitioned into seeking employment through the WIA Adult program. Ms. Terrell was not certain what type of employment she wanted, but used the High Demand List to determine a starting point. Using

this resource, Ms. Terrell realized the medical field was hiring and this sparked her interest. She also realized she would need higher education to become a Certified Nurse Aid (CNA). Again, Ms. Terrell made training goals and applied for an Individual Training Account (ITA) through Michigan Works!. Meeting the ITA requirements, she was approved to attend the CNA program at Walker Medical.

Ms. Terrell's determination proved strong and she completed the CNA program on June 28, 2013. Her training and achievements opened the doorway for employment. On July 15, 2013, she began full-time employment at Brookcrest Nursing Home as a CNA. Ms. Terrell remains employed as a CNA and happily provides for her family. She is a success of the WIA program in many ways. She excelled at all levels of enrollment and now is able to use her training in the medical field to give back to her community.

Employer Success Stories

Employer: Aggressive Manufacturing Innovations, Inc.

MWA: Eastern Upper Peninsula Michigan Works!

Prosperity Region: 1

Aggressive Manufacturing Innovations, Inc. (AMI) is a manufacturing company headquartered in Lewiston, Michigan. Founded in 2000, AMI is a Tier 1-2 supplier to the agriculture, construction, automotive, heavy truck, and marine industries. In 2010, AMI expanded its operations to Sault Ste. Marie, opening a facility in the local industrial park.

About six months prior to their projected opening date, AMI began working with the Eastern Upper Peninsula Michigan Works! Agency to discuss the available talent pool, collect resumes, and advertise the plant opening. The relationship that developed has been extremely beneficial to both AMI and Michigan Works!

Initially, AMI was assisted in staffing through grants from the WIA Adult, Dislocated Worker, and On-the-Job Training programs and the Michigan Prisoner ReEntry program. Following its ramp-up to full production, AMI now employs 85 people, many of whom were hired through collaboration with Michigan Works!.

Following its first year of production, AMI and other local manufacturers worked in partnership with Michigan Works! and Lake Superior State University to develop a Basic Machine Tool class to train employees in manufacturing technologies. Of the first 17 people that graduated from the training, AMI hired five, all of whom were funded through the WIA Adult program. Most recently, AMI hired an additional six employees from the Basic Machine Tool class that

graduated in June 2013; all six were funded through the WIA Adult and Dislocated Worker programs.

Primarily due to the relationships developed before opening and continuing to this day, AMI and Michigan Works! have had great success in developing the talent needed locally and getting employees into the job market. AMI has become a premier employer in Sault Ste. Marie, providing good paying jobs in an economically challenged region of the state.

WIA Waivers and Success Stories

The following waivers, approved by the USDOL, were implemented during PY 2012.

- Waiver allowing local Workforce Development Boards to use up to twenty percent of Allocation Year (AY) 2012 WIA Dislocated Worker funds to support local Incumbent Worker Training (IWT) programs as part of a layoff aversion strategy under the WIA Section 134(a). All training under this waiver is restricted to skill attainment activities.
- Waiver allowing the transfer of up to fifty percent of local formula funds between the WIA Adult and Dislocated Worker programs under WIA Section 133(b)(4).
- Waiver allowing the use of a sliding scale based on employer size or length of unemployment for On-the-Job Training employer reimbursement under the WIA Section 101(31)(B).
- Waiver allowing a sliding scale based on employer size for the Customized Training employer contribution requirement under WIA Section 101(8)(C).
- Waiver allowing the use of Individual Training Accounts (ITAs) for Older and Out-of-School Youth program participants at 20 CFR 664.510.
- Waiver of the requirement at WIA Section 134(a)(2)(B)(ii) to conduct evaluations of WIA activities for adults, dislocated workers, and youth.

The aforementioned waivers assisted the State and local areas in further developing and operating an IWT program focused on layoff aversion and skill attainment activities, increased local areas' flexibility to meet fluctuating demand for services, and increased the capacity of

local areas to respond to individual training needs. Waivers are a critical tool for Michigan's workforce investment system. They provide local areas with the flexibility necessary to respond efficiently and effectively to changing local conditions and demands.

Incumbent Worker Training (IWT) Waiver

Training for employed workers is beneficial for employers, workers, and regional economies. Layoff aversion strategies focus workforce development efforts on upgrading and expanding the skills of employed workers to prevent layoffs. IWT promotes greater job retention, facilitates more stability in the workforce, and heightens chances for advancement, higher wages, and continued employability.

Michigan was granted a waiver to allow local areas to use Dislocated Worker formula funds to support IWT. The use of Dislocated Worker formula funds during PY 2012 to support IWT is documented in the table below. The amount of funds used for training varied greatly, with Kalamazoo/St. Joseph using 16 percent, while Region 7B used 1 percent. Additionally, two local areas received approval for, but did not utilize, this waiver during PY 2012.

PY 2012 Dislocated Worker Funding for Incumbent Worker Training

Agency	IWT Costs	Formula Award	Percent of Award
Berrien/Cass/Van Buren	\$20,700	\$884,528	2%
Calhoun ISD	\$22,338	\$662,991	3%
Central Area	\$39,254	\$673,727	6%
Genesee/Shiawassee	\$143,605	\$1,508,338	10%
Kalamazoo/St. Joseph	\$126,900	\$782,619	16%
Livingston County	\$20,448	\$453,538	5%
Region 7B	\$4,150	\$473,157	1%
South Central	\$66,261	\$878,040	8%
Southeast Michigan Community Alliance	\$300,797	\$3,599,024	8%
Thumb	\$14,903	\$846,727	2%

Adult/Dislocated Worker Funding Transfer Waiver

This waiver provided local areas greater flexibility by better aligning resources with current demand for services. A transfer authority of up to 50 percent between the Adult and Dislocated Worker programs allowed both programs to more efficiently and effectively respond to changes in demand for services, increased capacity, and improved customer service.

One out of seventeen local areas utilized their granted waiver authority to transfer funds in excess of the 30 percent limitation between the WIA Adult and Dislocated Worker programs during PY 2012 as depicted in the table below. Waivers were utilized to keep students enrolled in training, eliminate waiting lists, enroll students into accelerated certificate programs, and to provide innovative training in high-growth, high-demand industry areas.

PY 2012 Transfers Between the Adult and Dislocated Worker Programs

Agency	From/To	Formula Award	Transfer Amount	Percent Transferred
Capital Area	DW/Adult	\$1,084,655	\$140,000	13%
Central Area	DW/Adult	\$673,727	\$288,350	43%
Eastern U.P.	DW/Adult	\$196,408	\$46,000	23%
Northeast	DW/Adult	\$480,205	\$113,000	24%
Oakland County	DW/Adult	\$3,279,775	\$500,000	15%
Ottawa County	DW/Adult	\$767,103	\$49,500	6%
Region 7B	DW/Adult	\$473,157	\$40,000	8%
Thumb	DW/Adult	\$846,727	\$250,000	30%
West Central	DW/Adult	\$480,264	\$144,079	30%

Note: Eight additional local areas were granted approval to utilize this waiver during PY 2012 but did not enact any transfers between their WIA Adult and Dislocated Worker programs.

On-the-Job Training (OJT) and Customized Training Waivers

Waivers were granted to four local areas that allowed sliding scales based on employer size for Customized Training employer contribution requirements. In addition, waivers were granted to eight local areas that allowed sliding scales based on employer size and/or length of unemployment for OJT employer reimbursement.

On-the-Job Training waivers to increase employer reimbursement for OJT through a sliding scale were based on the size of the business or the length of an individual's unemployment. Training delivered under the waiver allowed local areas to provide additional assistance to employers in creating jobs for WIA participants. The waivers provide assistance to employers in creating jobs sooner, rather than later, by reimbursing some of the cost of training new workers.

Waivers of the required 50 percent employer contribution for Customized Training utilizing a sliding scale were also based on the size of the employer. Under the waiver, a sliding scale for the employer matching cost component created an incentive for small and mid-sized employers to participate in Customized Training, resulting in high-skill, high-demand, and/or high-wage attainment.

Individual Training Accounts (ITAs) for Older and Out-of-School Youth

Funds utilized for Older and Out-of-School Youth ITAs allowed youth to access training earlier and provided the experience of responsibility through real-life, informed decision-making. Allowing youth to use ITAs streamlined services, increased customer choice, and increased local flexibility. Waivers were approved for ten local areas.

Waiver Impact

The waivers granted to the State of Michigan for PY 2012 provided the State and local areas with increased flexibility in the administration and operation of WIA-funded programs. The increased flexibility enabled local areas to tailor their programs to meet local participant and employer demands and to ensure specific needs were met. Dislocated Worker formula funds used to provide IWT enabled local areas to design layoff aversion strategies including upgrading and expanding the skills of their existing workforce.

As in prior years, Michigan's waivers for PY 2012 focused primarily on program operations, rather than on local performance outcomes. The waivers indirectly affected performance by averting potential layoffs, thereby reducing the number of additional dislocated workers who need the services of the public workforce investment system following layoff. Key waiver impacts were as follows:

- Local areas had greater control over program design and program management. The
 increased local flexibility to respond to local and regional economic conditions
 provided the ability to more efficiently and effectively respond to ever-changing
 workforce training demands.
- Provided employers with access to training resources necessary to remain viable and competitive in today's global economy. Higher local labor force quality is a key competitive factor affecting a local area's attractiveness for location and growth of business. Higher labor force quality drives local creation of high-quality jobs, thereby resulting in increases in local earnings per capita.
- Increased the skills of local and regional workforces by learning new technologies, enabling Michigan's workers to be globally competitive and offering workers the chance to advance to higher paying positions or maintain their current jobs and avoid layoffs.
 Increased skills increases long-range earnings potential.

- Filled employment gaps in high-demand, high-growth occupational fields, such as agriculture, energy, healthcare, information technology, and manufacturing with training relevant to employer needs.
- Built and expanded positive relationships between employers, local areas, service providers, and community colleges and other training institutions by better aligning capacity with demand for services.
- Increased access to training and consumer choice through building a stronger partnership base with training institutions by offering training that is customized to the particular skill needs of individual employers.
- IWT funds, leveraged with other training funds, proved to be a very cost effective method for providing training with limited resources.

Challenges

As in prior years, there were challenges identified with operating an IWT program as authorized under our waiver. Challenges included:

- Additional administrative responsibilities and costs associated with reporting requirements. Employer time and costs associated with the coordination and follow-up with paperwork and documentation creates administrative burdens and disincentives for employers to participate in IWT programs. Employers view IWT reporting requirements as "bureaucratic red tape." The time required by local area staff to conduct expanded data entry and documentation collection requirements adds additional administrative costs.
- Employer liability concerns in collecting data to satisfy reporting requirements.
 Employers are apprehensive about possible complications and ramifications for collecting, maintaining, and disposing of additional employee records.
- Worker privacy concerns over the collection of private information by employers and local areas.

Waiver Success Stories

Employer: Sturgis Molded Products

MWA: Michigan Works! Kalamazoo and St. Joseph Counties

Prosperity Region: 8

Sturgis Molded Products was awarded an Incumbent Worker Training Grant designed to upgrade the skills of its employees. The \$36,683 grant was awarded through Michigan Works! Kalamazoo-St. Joseph Counties to help the company increase competitiveness through training initiatives with existing employees.

Process employees at the plant began training in early February. Classes included Systematic Molding and Master Molder I and II training. All of the training was completed in early May 2013.

"Strengthening today's workforce is a critical component in business vitality," said Glen Oaks Community College President, Gary Wheeler. "The bottom line is that we are addressing training needs so that area businesses can retain employees, avoid layoffs and focus on quality. This benefits employees and the company while contributing to economic development in the region. This is a great example of how collaborative efforts can identify and address needs."

In addition to Sturgis Molded Products, the partnership involved Southwest Michigan First, the organization which was instrumental in identifying the need at the Sturgis plant, Michigan Works!, the agency which received the federal and state funds and awarded the grants, and Glen Oaks Community College, the institution administering the training.

One of the employees who received training was Andrew Hall. Mr. Hall completed the Systematic Molding I class and scored very high on his post-test. Since that time, he has applied the knowledge he acquired on material impact, mold design, machine constraints, and processing issues of pressure cooling. The results have been impressive; Mr. Hall's shift/plant has attained 58 percent improvement in the quality of the parts produced and 28 percent improvement in productivity which was a direct intent of the course and training.

Mr. Hall has already benefitted from a 14 percent increase in wages in the six months following his training. Future career advancement opportunities for him will be in the form of leading a larger production area for his shift or promotion to the manager of his plant for all three shifts.

"By increasing our processing training, we will increase the number of employees who will be capable of running, understanding, trouble-shooting, and producing 'perfect' parts on all shifts

and throughout the weekend," said Kelly Presta, vice president, Sturgis Molded Products. "This is critical to meet the increasing volumes of our business and better support our customers in exceeding the needs of their marketplace."

"The workforce of Sturgis Molded Products is what truly gives the company its competitive advantage," said Ron Kitchens, chief executive officer of Southwest Michigan First.

"Manufacturing high quality products on demand requires workers to keep their skills ahead of market trends. When companies like Sturgis Molded Products commit to technical training offered at a variety of skill levels, they experience tremendous results."

Sturgis Molded Products is a manufacturer of plastic injection molding parts serving the automotive, consumer, medical and nutrition, heavy truck, and appliance industries.

Youth Program Outcome Definitions

"Older Youth"

1. Entered Employment Rate Not employed at registration, but employed during the 1st quarter after

program exit. Not enrolled in post-secondary education or advanced training in the 1st quarter after the exit quarter or are employed in the 1st

quarter after program exit.

2. Employment Retention Rate

Employed in the 1st quarter after program exit and was still employed in the

2nd and 3rd quarters after program exit. Not enrolled in post-secondary education or advanced training in the 3rd quarter after the exit quarter or are

employed in the 3rd quarter after program exit.

3. Earnings Change

Employed in the 1st quarter after program exit. Not enrolled in postsecondary education or advanced training in the 3rd quarter after the exit

quarter or are employed in the 3rd quarter after program exit. Compares

earnings youth had before services and 6 months after services.

4. Credential Rate

Employed, or in post-secondary education, or in advanced training during the

first quarter after the exit quarter and received a credential/certificate by the end of the third quarter after the exit quarter.

"Younger Youth"

5. Skill Attainment Rate In-school youth or out-of-school youth assessed to be in need of basic skills,

work readiness skills, and/or occupational skills.

6. Diploma or Equivalent Not enrolled in secondary school at exit. Attain a secondary school diploma or **Attainment Rate** equivalent by the end of the first quarter after program exit.

7. Retention Rate Not enrolled in secondary school at exit. Employed, or in post-secondary

education, or in advanced training, or in military service, or in a qualified

apprenticeship during the third quarter after the exit quarter.

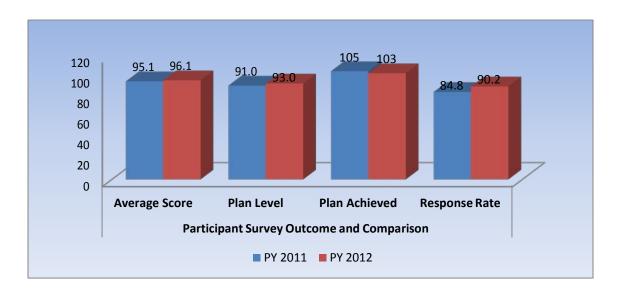

Table 4: WIA Participant Customer Satisfaction

Note: The weighted average of participant ratings on each of the three questions regarding overall satisfaction is reported on a 0-100 point scale. The score is a weighted average, not a percentage.

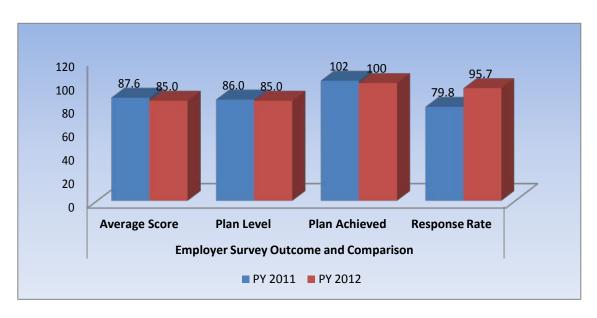

Table 5: WIA Employer Customer Satisfaction

Note: The weighted average of employer ratings on each of the three questions regarding overall satisfaction is reported on a 0-100 point scale. The score is a weighted average, not a percentage.
